PROJECTS

Car Rental Application:

Developed with Flutter and Firebase

- Designed and implemented a user-friendly car rental mobile application.
- Enabled secure user login and profile management functionalities.
- Integrated Firebase for real-time database management.
- Enhanced administrator capabilities for seamless vehicle data updates.
- Resulted in improved user engagement and streamlined administrative tasks.

Instagram Clone

Developed using HTML, CSS, Tailwind, and JavaScript

- Created a fully functional Instagram-like web application.
- Emphasized strong frontend skills with responsive design and intuitive user interactions.
- Utilized Tailwind for efficient and customizable styling.
- Demonstrated expertise in user interface design and frontend development.

Car Rental Website

Developed using HTML, CSS, Tailwind, and JavaScript

- Engineered an engaging and intuitive car rental website.
- Focused on crafting a visually appealing interface with seamless navigation.
- Applied technical skills in frontend development to enhance user experience.
- Resulted in a professional, easy-to-use platform for car rental services.

ADDITIONAL

Technical Skills
